

VARSHA COIR PITH & COIR PITH PRODUCTS

Varsha Coir peat products are made from the best quality of pith which is washed, treated and defibred to meet the most stringent of International Specifications.

The Main products are coir peat for raising seedlings, for growing plants in containers for soil conditioning and for grow bags.

The products are made in highly mechanized factory. The product specification like electrical conductivity, ph, water holding capacity is controlled as required.

The growing media are made from a blend of coir peat, coir chips, German peat, expanded perlite, exfoliated vermiculite, zeolites etc.as per client's requirement.

The coir peat media are made in compressed blocks for reducing volume (to save transportation and saving in storage) and increasing shelf life.
