

# VARSHA ENTERPRISES®

## VARSHA GROW GOLD ALL PURPOSE MIX

### VARSHA ALL PURPOSE MIX CONTAINS:

Varsha All Purpose Mix is a blend of Cocopeat, Husk Chips, Peat Moss, Expanded Perlite and Compost. It is treated with homeopathic ingredients for better and consistent results. It is enriched with beneficial micro-organisms and sea-weed fertilizer.

**IDEAL FOR:** Ornamental plants including Coleus, Dracaena, Begonia, Alocasia, Philodendron. Flowers including Zinnia, Petunia, Calendula, Marigold, Chrysanthemum. Vegetables including Tomatoes, Chillies, Brinjal and leafy greens.

### HOW TO USE:

- ☼ Choose a pot with a drain hole at the bottom and fill 2/3rds with the growing media.
- ☼ Place the plant and fill the pot with the remaining media up to the collar. Ensure to firmly press the media all around and drench it with clean water.
- ☼ Place the transplanted plant in the shade for 2 days, then move it to the desired location.
- ☼ Feeding with organic fertilizer can start within a week. However, chemical fertilizer application can be started after about 10 days or after the observation of a new leaf.
- ☼ All plant protection sprays (chemical/organic) can start after 15 days of transplantation.
- ☼ Store the excess material in a safe place, away from rodents, insects and pets.

### WATERING TIPS

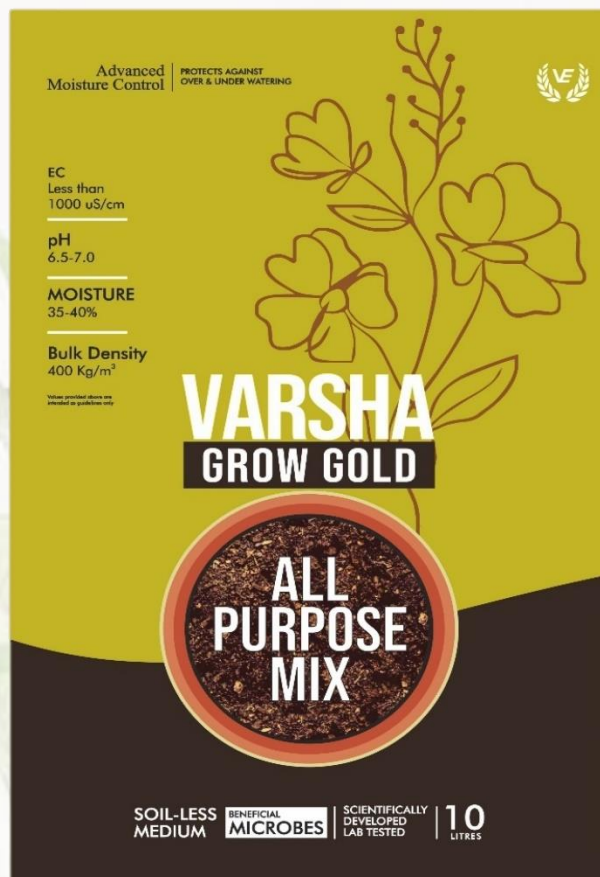

- ☼ Check growing media for wetness regularly. Let the media dry out partially between watering.
- ☼ Adjust water volume based on plant size, growing conditions and media type.
- ☼ Excess moisture can lead to pest and disease issues, so avoid over watering.
- ☼ Preferably irrigate plants in the morning to allow the foliage to dry out during the day.

### BENEFITS OF USING SOIL-LESS MEDIA

- ☼ As pioneers in soil-less cultivation, we draw upon our 40 years of accumulated knowledge and experience to scientifically design our media.
- ☼ Each formulation is meticulously tailored to meet the specific needs of individual plant species.
- ☼ We incorporate beneficial microbes that act as bio-control agents, enhancing the health and vitality of our soil-less media.
- ☼ We source our raw materials from highly reputable and internationally acclaimed suppliers.
- ☼ At Varsha Enterprises, we are in the pursuit of a greener world, where everyone has easy access to a clean, high quality growing media-because every plant, and every hobbyist gardener, deserves the best start.

### PHYSICAL PROPERTIES

- ☼ EC: Less than 1000 uS/cm
- ☼ pH: 6.5-7.0
- ☼ Moisture: 35-40%
- ☼ Bulk Density: 400 Kg/m<sup>3</sup>
